SUMMARY

Final-year B.Tech student in Electronics and Communication Engineering with hands-on experience across software, systems, and hardware. Internship experience at IIT Bombay and NIT Srinagar, working with Python, Linux/BASH, Git, and applied machine learning fundamentals. Comfortable picking up new tools quickly, working independently in Linux-based environments, and translating academic learning into practical, working solutions. Looking for an entry-level role where I can contribute technical skills while continuing to grow.

SKILLS

Programming: Python, C

Linux & Scripting: Linux Command Line, BASH Scripting, Regular Expressions, SED, AWK, Remote Login (SSH)

Tools & Platforms: Git, GitHub, KiCad, MATLAB, Multisim, Microsoft Office

Electronics & Hardware: Circuit Design, Soldering, Basic Power Supply Design

Python Applications: Networking (Sockets Basics), Database Interaction, Web Scraping

Professional Skills: Communication, Analytical Thinking, Team Collaboration

EDUCATION

B.Tech in Electronics and Communication Engineering

2022 – 2026

Islamic University of Science and Technology (IUST), Pulwama

EXPERIENCE

Summer Intern

Jun 2024

Indian Institute of Technology, Bombay

- Worked extensively in a Linux-based environment, automating routine tasks using BASH scripting.
- Applied Python for scripting and data handling, and used Git for version control.
- Strengthened command-line proficiency while supporting day-to-day technical operations.

Winter Intern (Internship cum Training)

Jan – Feb 2025

National Institute of Technology, Srinagar

- Acquired hands-on experience in Machine Learning and AI fundamentals, including data preprocessing and exploratory analysis.
- Implemented basic ML models using Python and assisted in building end-to-end ML workflows.
- Contributed to interpreting model outputs and evaluating performance.

PROJECTS

Power Supply cum Mobile Charger

- Designed a regulated DC output suitable for mobile charging, with attention to basic safety and stability.

LICENSES & CERTIFICATIONS

e-Yantra Online Software Foundation Course

Jul 2024

IIT Bombay • Skills: Basic Linux Commands, Shell Scripting, Regular Expressions, SED, AWK

Python Fundamentals

Sep 2024

DIGISAKSHAM • Skills: Python Programming, Core Python Concepts

FOCUS POINTS

- **Software Development:** Building reliable and efficient software systems using Python, with emphasis on clean code and problem solving.
- **Web Technologies & Security:** Exploring web development fundamentals and web security, including secure application design and common vulnerabilities.
- **Networking & Linux Systems:** Developing practical understanding of computer networks and Linux-based system administration.
- **Applied Machine Learning:** Applying basic ML techniques to real-world problems, with emphasis on data preprocessing and model evaluation.
- **Artificial Intelligence (Foundations):** Building foundational knowledge in AI concepts and algorithms, with long-term interest in intelligent systems.

WORKSHOPS & WEBINARS

One-Day 3D Modelling and Printing Workshop

Jun 2025

CIED–IUST Foundation • Introduction to 3D Modelling Concepts, Basics of 3D Printing Workflow

Mind Over Matter

21–22 Nov 2024

National Institute of Technology (NIT) Srinagar • 2-day workshop on stress management, addiction awareness, and harassment

AI & ML in Real Life: Exploring Practical Applications

27 Dec 2024

Conducted by GUVI

Master the Art of Data Visualization

26 Dec 2024

Conducted by GUVI
